

BIESSE K60 TRIM

Semi automatic edge-trimming machine

Minimum size,
maximum
performance

Made In Biesse

The market demands

a change in manufacturing processes that enables companies to accept the **largest possible number of orders**. This is coupled with the need to maintain high quality standards whilst offering product customisation with **quick and defined delivery times**.

Biesse meets these requirements

with **technological solutions** that highlight and support technical expertise as well as process and material knowledge.

K60 Trim is a compact semi-automatic edge trimming machine which performs the edge trimming applied on straight and shaped panels.

- ✓ **Extremely easy to use.**
- ✓ **Precise and accurate working by completing the process performed by the semi-automatic edgebanding machine.**
